Tekla Constructible Online Training

Tekla Structures: Advanced General

Tekla Structures: Advanced General

This training course provides experienced Tekla Structures users with the knowledge and the tools needed to progress to the advanced stages of the Tekla Structures program. The training is divided into lessons, each of which focuses on a certain feature of the program and provides in-depth instructions geared at helping users master each feature.

Please Note: Depending on what version you have chosen to use and how you have Windows set up, you may see some differences in how the interface appears while going through this training. To download the latest version you can visit the Tekla Download site here: [Download Tekla Structures](#).
